WHO IS MDE MACHINERY?

MDE is a forward thinking, imaginative manufacturer based just outside the small village of Markethill, Northern Ireland. Since MDE was formed in 2013, founders Mark and Dean Belford have been leading the company into rapid yearly growth.

"As children we made our own toys to play with in the garden, our dreams were that someday we would own a factory making toys for other children. As the years progressed so did our enthusiasm for engineering. We have never seen engineering as a job or career it's our passion!"

MDE'S vision and dream is now to become a global manufacture that people can put their trust in when building the equipment they need. MDE currently can be found in over 12 different countries and as far away as New Zealand. They are always striving to push the MDE brand globally and welcome any international dealers to be part of their team.

MDE work closely with their customers and dealers to improve and discover new products. They believe in order to design world market leading equipment they need their customers opinions and ideas. MDE specialise in the design and manufacture of quarry, recycling, agricultural and forestry equipment.

Rhino 9ft/2.6m

Rhino Pak 9ft is perfect for farmers and small contractors

Key Features

Side wheel (stop damaging walls)

Water fill ballast weight

Stands (to safely hook compactor off)

Cat 2 and 3 linkage as standard

Reflective warning strips

Compacting rings

Horsepower: 100hp (minimum)

Rhino 10ft/3.0m

Rhino Pak 10ft is suited for larger tractors to compact forage material

Key Features

Side wheel (stop damaging walls)

Water fill ballast weight

Stands (to safely hook compactor off)

Cat 2 and 3 linkage as standard

Reflective warning strips

Compacting rings

Horsepower: 150hp (minimum)

MANAGE | DESIGN | ENGINEER

RHINO PAK

Every great harvest ends in the silo. The compaction process is an important process for silage. By increasing the compaction pressure of your harvest, you will generate more heat and produce firmer silo. Research has shown that the fermentation of forage material such as maize and grass is positively impacted by increasing compaction pressure.

The MDE Rhino Pak will increase your overall weight, and gives you access to hard to roll areas such as back walls and sides. High losses and low quality can occur if the compaction is too low. By ensuring that these areas are well compacted, you reduce the amount of waste that occurs from bad silo compaction. Giving your animals better quality feed.

Coming Soon...

Rhino - 4 ton

4 ton versions will be available for 10ft & 12ft Rhino compactors

Key Features

Side wheel (stop damaging walls)

Water fill ballast weight

Stands (to safely hook compactor off)

Cat 2 and 3 linkage as standard

Reflective warning strips

Compacting rings

Horsepower: 250hp (minimum)

Rhino Pak Optional Extras

We offer a range of optional extras to make your harvest run smoothly

Optional Extras

LED Work Lights

Road Lights

Road Warning Strobes

Extra Weight Ballast
